DISCLAIMER: Features and UI design may not be final!

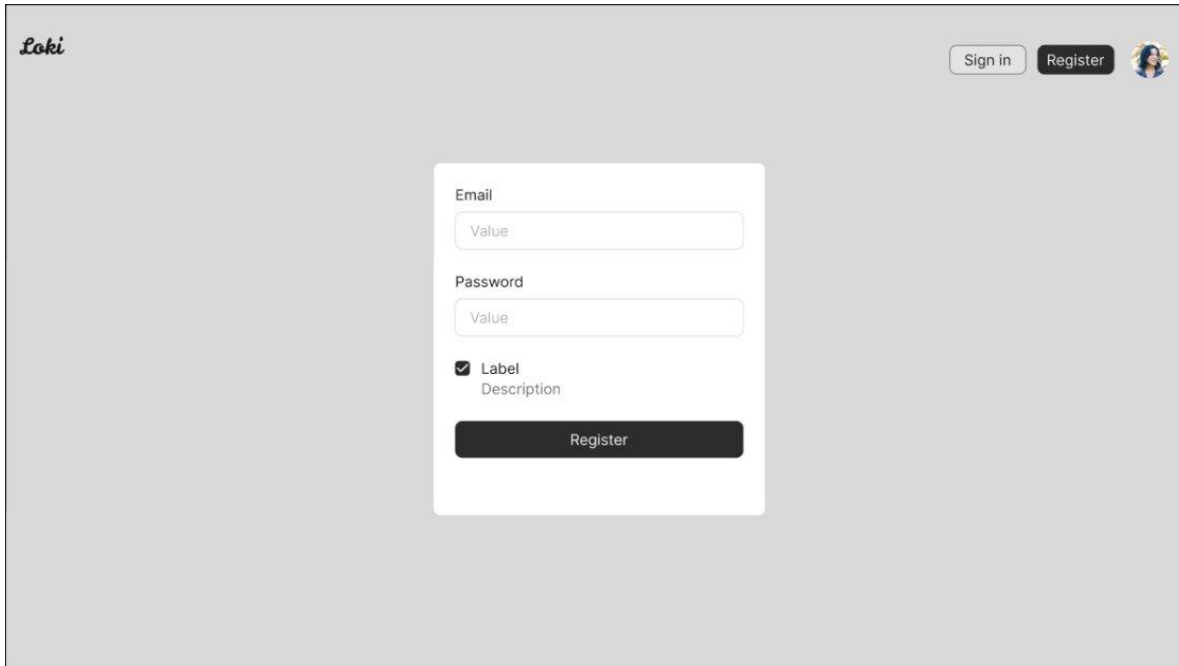

Project LOKI will log your life and events

The screenshot shows the 'Loki' web application interface. At the top, there's a navigation bar with the 'Loki' logo, a 'Sign in' button, a 'Register' button, and a user profile icon. Below this is a tabbed interface with 'Main', 'Create', and 'Options' tabs. The 'Options' tab is active, displaying two sections: 'Account' and 'Data'. The 'Account' section has input fields for 'Name' (containing 'John') and 'Surname' (containing 'Smith'), and a 'Change password?' link. The 'Data' section features a red 'Delete all data' button and a checkbox labeled 'I understand this will delete all my data and I cannot get it back', which is currently checked. Both sections have a downward arrow icon in the top right corner.

- You can register your own profile to LOKI and start logging.
- You will have your own logs dedicated to rest, personal finances, a calendar for schedules and a page for personal notes. (Final features to be decided)
- You will be able to see statistics based on the data you provide.

Account management

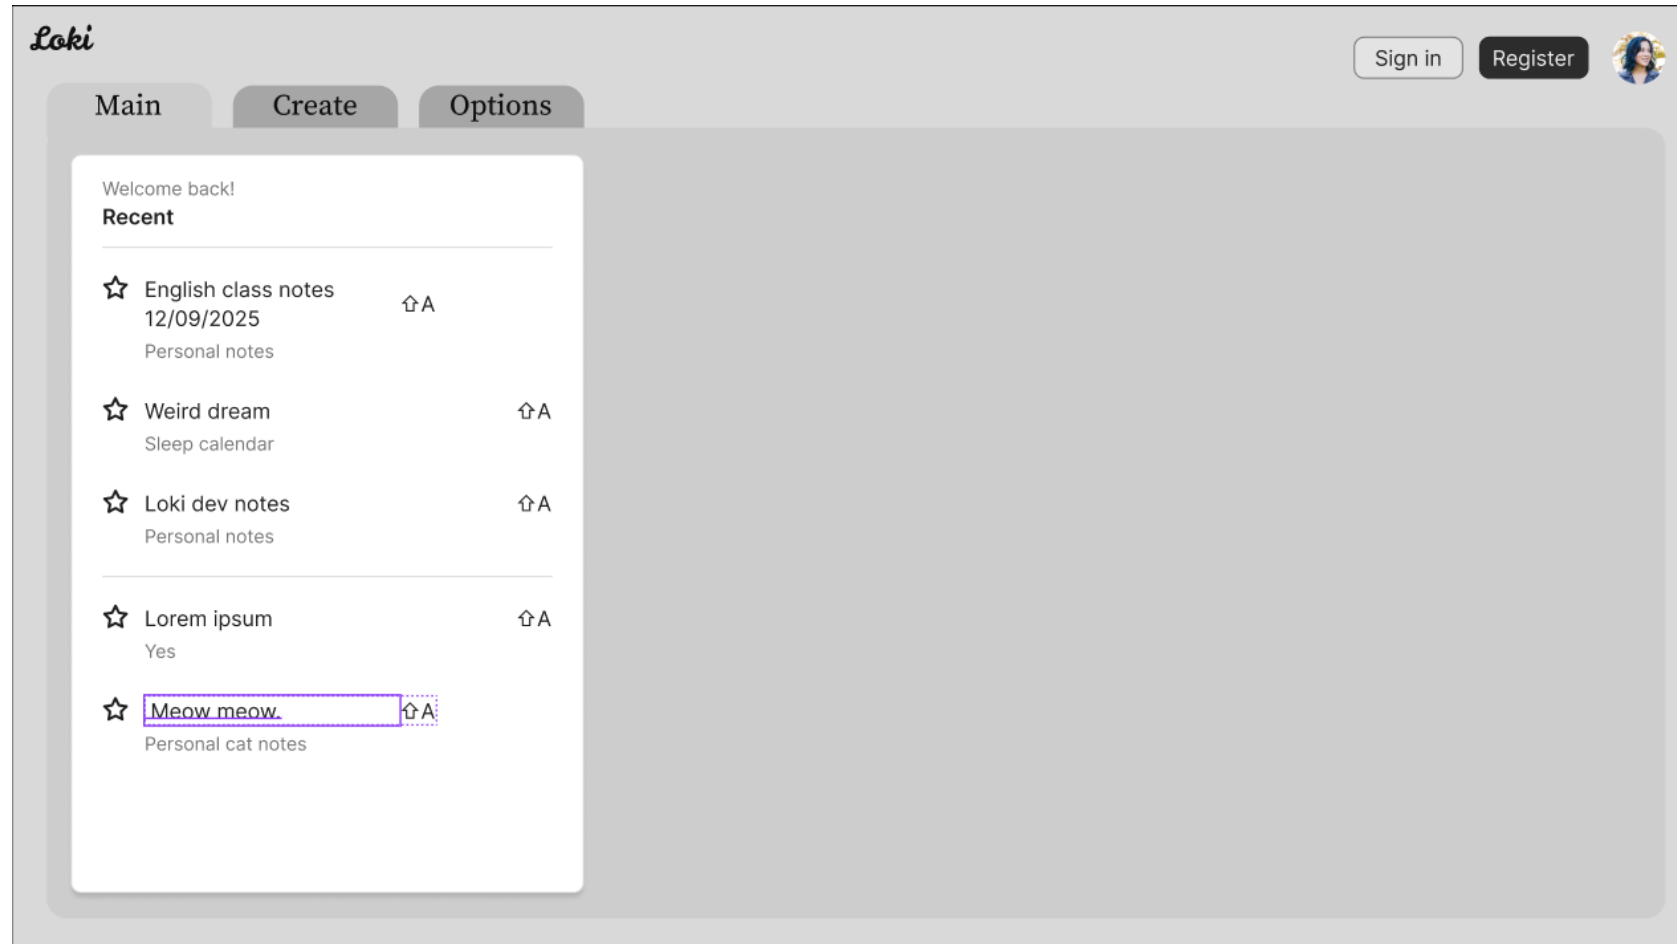

The screenshot shows a web application interface for account management. In the top left corner, the logo "Loki" is displayed. In the top right corner, there are two buttons: "Sign in" and "Register", followed by a small circular profile picture of a person. The main content area features a white registration form centered on a light gray background. The form contains the following elements: an "Email" label above a text input field with the placeholder "Value"; a "Password" label above another text input field with the placeholder "Value"; a checked checkbox labeled "Label" with a "Description" label below it; and a dark gray "Register" button at the bottom.

- The user will be able to register and log into an account.
- Login credentials are stored locally and encrypted, no peeking!
- User data can be modified, removed and reset.

The main page

- Recent notes
- Statistics? E.g. Amount of sleep this week.
- General overview

Cancel OK

+

- The user can create different types of notes, such as calendar notes, personal notes and keeping track of sleep.
- These notes can be viewed whenever and are categorized by their type.

Plans and ideas

- Dream journal?
- Calculators? E.g. daily expenses.
- UI colour scheme customization?

Conclusion

- Personal logger
- Future improvements
- Next steps
